

FAQ – X6/CM27/CM33 The PowerCONTROL™ (touchpanel) works in the docking station, but not if you remove it!

		<ol style="list-style-type: none"><li>1. Check the position of the switch!</li><li>2. The internal battery is defect!</li></ol>
--	--	---

	<p>NOTE: The internal battery can be exchanged by opening the back cover of the unit.</p>
--	---

	<p>If you push the button on the right side, you are able to see the battery status. As you can see, there are two batteries.</p>
--	---

	<p>The second battery is located at the back of the device.</p>
