

FAQ – CM27_003 Holding magnets always “ON”!

	<p>NOTE: The impact of this problem - PLC might switch to stop, and the centering column will lower itself.</p>
--	--

Corrective:

	<p>Check the wiring of the holding magnet for a short circuit.</p>
--	--

	<p>Exchange the relay of the magnet control. Refer to the electrical scheme and picture beside.</p>
