Muelisacker 221
5705 Hallwil
Switzerland

Repubblica di San Marino, 29 September 2004

GRUPPO ASA with its headquarter in San Marino, 3 more plants in Italy and additional facilities located in Belgium, Tunisia and Romania is a pool of companies offering a wide range of products and high-quality production to its customers.

We are constantly tested by our customers in terms of our ability to provide a rapid and on-time service. In order to fulfill these demands we need to work together with top reliable and future oriented machine-suppliers.

With Can Man we've found such a company and and bought five fully automatic and one semi-automatic welder since our first contact in 1999.

Our operators esteem the simple, top reliable and modern systems and designs of the Can Man machines as well as the short change-over-times for diameter-and height-changes.

Furthermore the maintenance work is quite simple due to the fact, that components can be reached/cleaned/changed and, if needed, lubricated easily.

Technical inquiries are answered within shortest time by phone, fax, e-mail or if needed even by a personal visit of qualified technicians.

To cut a long story short: we are happy to do business with Can Man and appreciate the straight, open and friendly relationship.

Best regards
Carlo Bisacchi
